

Francis Megerlin is Full Professor, health laws and systemics, at the University of Strasbourg / EUCOR since 2016, and Senior Fellow, Berkeley Center for Health Technology (BCHT) at the university of California since 2009. He also lectures in several european and non-european universities and at the Université Internationale Abulcasis des Sciences de la Santé (UIASS) in Rabat, Morocco, whose he is member of the scientific council since 2018. He is a full member, Académie Nationale de Pharmacie, France.

Francis holds a PhD in International & Comparative Law (settlement of complex disputes & ADR laws), and a HDR in Pharmaceutical Sciences (information systems). His teaching covers transversal topics, including health laws and economics, governance of systems and international trade. His current research focuses on the systemic impact of advanced health technologies on qualification, assesment and pricing methods for health products, services & solutions, within changing ecosystems and geopolitics, and on the competitive transformation of complex organizations under constraints.

Francis has published over 120 papers in scientific and policy journals, chapters in books, etc. His activities include his roles as keynote-speaker for invited conferences, policy roundtables for public and private decision support, national reforms and board meetings in Europe, North America, Africa and Asia. He also plays the oboe and is an orchestra conductor.
